Dear Sir,

We are glad to quote as under:

1. UNIEXTRUDE 150- LABORATORY RADIAL RADIAL BASKET EXTRUDER

I hope our offer meets your specifications, in case of any query, please feel free to contact us.

Sincerely,  
For S B Panchal & Co.  
Hiren Panchal

**1. UNIEXTRUDE150- LABORATORY MODEL RADIAL BASKET EXTRUSION SYSTEM**

| Sn. | Item                               | Description                                                                                                                                                                                                                                                                                                                                                       |
|-----|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.  | <b>System Description</b>          | UNIEXTRUDE– Radial Basket Extruder for processing extrudates.<br><br>This method of extrusion has vertical pressing roller transferring the material to the pressing cam, which in turn press the material on the required size of perforated mesh.                                                                                                               |
| 2.  | <b>Capacity</b>                    | BXT - LAB Maximum processing capacity : 500gm/hr to 5kg/hr<br><br>Note : Output depends upon the Bulk density and material specific properties                                                                                                                                                                                                                    |
| 3.  | <b>Material Of Construction</b>    | All the contact parts shall be made in S.S. 316 quality material. All non contact parts shall be made from S.S. 304 quality material except bought out materials like motors and gear box.                                                                                                                                                                        |
| 4.  | <b>Extruder</b>                    | Extruder assembly consists of a feed hopper feeding the material directly to a Radial Basket in which a pressing IMPELLER presses the material against the mesh screen and extrude the material. A pusher rotating in opposite direction pushes the material downward towards the impeller.                                                                       |
| 5.  | <b>Feeding Assembly</b>            | Feed hopper shall be mounted above the extrusion assembly , the function of this hopper is to feed the Radial Basket extruder. The feeding hopper shall be made from S.S 316 quality material.                                                                                                                                                                    |
| 6.  | <b>Gear Box And Motor Assembly</b> | A suitable gear box consisting of a pair of Spur Gear & Worm gears shall be used to transmit power.<br><br>A variable speed drive of ABB OR EQUIVALENT MAKE shall be used to regulate the speed of the pressing flutes from minimum to maximum.<br><br>1 HP TEFC, 1440 RPM, IP-55 flange mounted electric motor shall be provided to drive the gear box assembly. |
| 7.  | <b>Controls</b>                    | Will be mounted on machine / fixed separately.<br>ON/OFF Push button for Motor with MCB<br>Speed Controller for extrusion.<br>R.P.M. display (digital).                                                                                                                                                                                                           |

**1. PRICE: UNIEXTRUDE150- RADIAL BASKET EXTRUSION SYSTEM**

| <b>Sn.</b> | <b>Item</b>                | <b>Description</b>                                                                                                                                  |
|------------|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1.</b>  | <b>Rs. 18,00,000/-</b>     | For UNIEXTRUDER150 Radial Basket Extruder as Described Above with radial discharge assembly along with 1 mm Radial Basket and manual control panel. |
| <b>2.</b>  | <b>Rs 1,75,000/-</b>       | For Automatic Pusher System instead of manual for pushing the material towards the extrusion impeller.                                              |
| <b>3.</b>  | <b>Rs. 1,35,000/-</b>      | For additional 0.6mm Radial Basket Mesh                                                                                                             |
| <b>4.</b>  | <b>Rs. 1,25,000/-</b>      | For additional 0.8mm Radial Basket Mesh                                                                                                             |
| <b>5.</b>  | <b>Rs. 1,15,000/-</b>      | For additional 1mm Radial Basket Mesh                                                                                                               |
| <b>6.</b>  | <b>Rs. 1,00,000/-</b>      | For additional 1.2mm Radial Basket Mesh                                                                                                             |
| <b>7.</b>  | <b>Rs. 1,00,000/- Each</b> | For each 1, and 1.2mm Radial Basket Mesh                                                                                                            |
| <b>8.</b>  | <b>Rs. 35,000/- each</b>   | For Installation & Commissioning                                                                                                                    |
| <b>9.</b>  | <b>Rs. 25,000/-</b>        | For Validation Documents comprising of DQ, IQ and OQ.                                                                                               |

**Terms and Conditions:**

**Prices** : Prices offered are net-ex-works Mumbai exclusive of Packing, Carting, Crating, Forwarding, Freight and any other incidental charges will be extra to your account.

**Taxes** : All applicable taxes(12.5 VAT), packing, forwarding, octroi, insurance, excise etc. shall be charged extra as and if applicable at the time of dispatch.

**Packing** : **2.5% Extra**

**Inspection** : Final Inspection prior to dispatch will have to be carried out jointly by us and your representative at our Mumbai works only. You will be intimated as soon as the machines are ready for dispatch.

**Transport** : Shall be paid by you directly to the transporter.

**Delivery** : Within 16 Weeks.

**Payment** : 1. 40%Advance on confirmation of order.  
2. 60%after factory test.

**Validity** : This offer is valid for 30 days.

**Warranty** : We undertake to make good by replacement or repair, defects arising out of faulty design, materials or workmanship within 12 months of the date of dispatch, purely on ex-works basis i.e., the defective part will be returned by the buyer to our works and replacement taken by the buyer from our works. Bought-out components are guaranteed by us only to the extent of guarantees given to us by our suppliers. Electrical components, such as heaters, motors, contactors etc. rubber components and instruments such as pressure gauges, thermometers, etc. and other such consumables, etc. are however not covered under this Warranty. Warranty stands void if spare parts other than OEM are used.

**Jurisdiction** : Any dispute arising out of this quotation is subject to the **JURISDICTION OF MUMBAI COURT ONLY.** All dimensions are approximate.

Design and Specification of all our products are subject to alteration, without notice.

**Thanking you and awaiting for your favourable reply.**

Yours truly,  
**For HUGOPHARM TECHNOLOGIES PVT. LTD**
